Thermal Technology Solutions

DETECT AND DEFEND YOUR ORGANIZATION AGAINST INVISIBLE

Take control of your work environment! Our Personnel Management Solutions feature check-in and temperature verification capabilities. These solution can also be programmed for facial identification, with users easily added in a few short clicks. Designed to help protect the health and safety of both employees and guests by preventing anyone with a temperature from entering a facility.

FLEXIBLE

Personnel Management Solutions are available in freestanding and countertop configurations.

ANTIMICROBIAL

An antimicrobial powder coat finish can be applied to the base of the unit to ensure durability and prevent the spread of germs.

SECURE

Create alerts when individuals above the temperature threshold and those without access attempt to enter.

MOBOTIX Thermal Radiometry Technology

More and more businesses have been called upon to provide better security for their employees, premises and the surrounding areas. Employees want to navigate the workplace with ease and employers want to be more aware of threats, intruders and vandals with an eye toward proactive awareness of a breach and defusing highly dangerous situations. By using heat signatures and applying ranges based on the environment and application, MOBOTIX Thermal Solutions mitigate overheating, risk of fires, identify elevated temperatures and enable first line defense in complete darkness as well as during the day. With MOBOTIX overlay you can distinguish actual event's, risk areas and react faster while still having a secure overview of the area in question.

PROTECT

MOBOTIX TR automatically triggers an alert upon the early detection of possible hazards such as smoldering fires, overheated appliances and other sources of heat or fire at distances up to several hundred meters.

PREVENT

With smart security solutions from MOBOTIX, we can provide actionable information for you to prevent a potential disaster within your offices, schools, stores or factory facilities and their perimeters.

The built-in intelligence thermal imaging solution can help you analyze processes, situations and behaviors to make decisions now that will impact your future.
